 Apple Inc. and Bill Ziegler (Bucks County IU)
 WHERE: Hertz/Rohrbach Rooms
 BCIU Main Office | 1111 Commons Blvd.
 WHEN: 8 a.m. to 12 Noon
 COST: @@
 REGISTER: Online at My Learning Plan

For nearly 25 years, Apple has been committed to helping students with special needs and disabilities access technology. Add to that the iPad, and you have a breakthrough device with innovative features that make it more accessible to users with impaired vision or hearing, or with limited physical or motor skills.

Join your colleagues in curriculum development and special education as we examine elegant iPad solutions and apps for students with vision, hearing and motor skills challenges. Learn how to break down the barriers to accessing information technology ~ and how to maximize communications, independence, participation and productivity of students with learning hurdles.

Open new doors. Register online today through MLP (I'll get you the link if you need) In this engaging half-day session, you will see that the iPad is easy to use, socially powerful and fast becoming the device of choice for learners of all abilities. This event registration is only \$\$\$\$ (I'm working on a number), and seats are limited.
